

HOW TO

Items needed:

- Empty 1 liter bottle
- Spacer
- Feeder pad
- Measuring device
- Funnel
- White Sugar

1. Pour 1/3 cup of sugar and 2/3 cup of water into a liter bottle.
2. Cover the opening with your hand and shake vigorously.

3. With bottle sitting upright, add the spacer.

4. Place the feeder pad on top of bottle with threads aligned and rotate clockwise until slightly snug.

5. Turn feeder upright and place it on a level surface

6. If you have a hanging feeder, attach the chains, find a location that is easily accessible and hang it.

NOTES

- o Your feeder may require a slight squeeze to start the flow of food.
- o Your feeder should be cleaned when the white feeder pad shows signs of debris. Use warm water only (no soap) for all parts of the feeder.
